

Staying in touch

The screenshot shows the AiiDA website. At the top, there are social media icons for Twitter, Facebook, and GitHub. The navigation bar includes links for Home, Download, Plugins, Docs, Tutorials, Events, Team, and a 'More' dropdown menu. The 'More' menu is highlighted with a red box and contains links for Features, Mailing list, News, Blog posts, Anthem, and Contact us. The main content area features the AiiDA logo and the text 'Automated Interactive Infrastructure and Database for Computational Science'. Below this, a paragraph describes AiiDA as a flexible and scalable informatics infrastructure. To the right, there is a section titled 'Recent news & events' with three news items: 'AiiDA project & Google Season of Docs', 'One post-doctoral position open at EPFL, Lausanne, Switzerland', and 'Tutorial on writing reproducible workflows for computational materials science Event'. A blue overlay with white text is positioned over the bottom right of the page, reading 'Subscribe to the mailing list! Very low traffic, very useful information and support'. At the bottom right, there are four red hexagons of increasing size and a number '1'.

AiiDA
Automated Interactive Infrastructure and
Database for Computational Science

AiiDA is a flexible and scalable informatics' infrastructure to manage, preserve, and disseminate the simulations, data, and workflows of modern-day computational science. Able to store the full provenance of each object, and based on a tailored database built for efficient data mining of heterogeneous results, AiiDA gives the user the ability to interact seamlessly with any number of remote HPC resources and codes, thanks to its flexible plugin interface and workflow engine for the automation of complex sequences of simulations.

Add 'verdi node gotorepository' command #1121

🔔 Open

greschd opened this issue on 15 Feb 2018 · 3 comments

greschd commented on 15 Feb 2018 • edited ▼

Collaborator

For inspecting results from the command-line, it would be nice to have an easy way to navigate to the repository folder, especially for `SinglefileData` or `FolderData`. What do you think about adding a `gotorepository` command, which takes you to the node's repository folder.

Or does this collide with the plans to add an object store backend for the repository, simply printing something like "This feature is not supported with the object-store repository." in that case.

Pick your reaction

Step 1 Tell us which features matter the most!

☐ Make the `--profile` option of `verdi setup` eager ✓ #2906 opened 17 hours ago by sphuber • Review required							2
☐ Remove warning about matplotlib fonts in BandsData.show_mpl() ✓ #2902 opened a day ago by borellim • Review required							1

Step 3 If you think you can fix it, please open a pull request!

What stops people from contributing

You might think

- On giving Feedback

"I don't have a GitHub account"

- On reporting issues

*"Developers are busy,
I don't want to disturb them."*

- On making pull requests

*"I'm not a python expert,
so I cannot contribute anything of value."*

Wrong! Simple fixes (docs!)
can have a huge impact.
